## **DETAILED ACTION**

### ***Drawings***

1. While the drawings filed on December 30, 2003 are acceptable, the drawings seem informal (handwritten). Applicant should submit drawings that are more suitable for printing as a quality patent, or should indicate that the handwritten drawings are intended for printing in the patent.

### ***Allowable Subject Matter***

2. Claims 1-20 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Applicant's claimed invention can be distinguished from prior art particularly by the "intermediate region" and the claimed relationships between the "intermediate region," the "lower region," and "the upper region," in the context of the other claim limitations, for "oxide" to be formed at the "intermediate region" on the "sidewalls of the trench."

The rejection under 35 USC 112, 1<sup>st</sup> paragraph stated in the last Office Action is withdrawn: Applicant has presented evidence that the asserted lack of enablement is unfounded (IDS #0805), in that ALD (Atomic Layer Deposition) is an enabling method for a non-conformal deposition required to have the intermediate region exposed for forming oxide on sidewalls of the trench.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
